# SOLID SURFACE

LYCOS, INC.

Basic to Advance  
Manufacturing

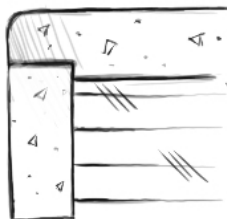

WAVY SEAM

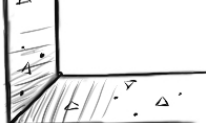

WALL CLAD

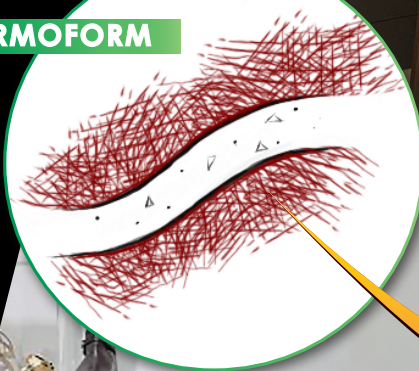

RABBET JOINT

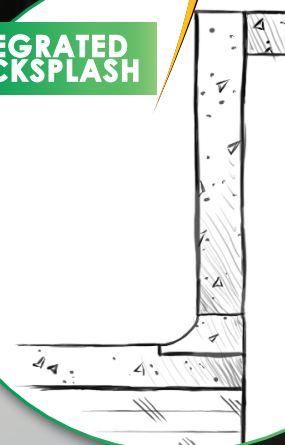

V GROOVE

THERMOFORM

INTEGRATED BACKSPLASH

## Features:

### Wavy Seam

Assembly seams are stronger, harder to identify to the eye and involve an easier installation.

### Rabbit Joint

Minimizes damage, increases strength and rigidity due to length.

### Thermoforming

Increasingly popular way to heat solid surface to create 3-D curves and custom shapes.

### Strip Oven

Capable of modifying large areas to create arches and bends to meet design requirements.

### Multiple CNC Machines

Accurately cuts large projects fast and effectively to reduce cost to customer.

### Edge Detail

Pick from a variety of solid surface edges that fit your needs.

### Integrated Backsplash

Ease of installation, due to a 1/2" scribe, backsplash provides visual design and protection between wall and solid surface.

### Wall Clad

Improves appearance and adds strength for wall protection with clean discreet seams.

### V Groove

Mitered edges provides a cleaner look and disguises seam from front profile.

"The Details are in  
The Craftsmanship"

## Peace of Mind with Lycos

- We are tremendous listeners. For each project, we include a free consultation involving project management to discuss the work at hand. We like to make sure our conception aligns with your vision.
- We understand the distinction of customization. Our engineers work diligently to design your unique product with the assistance of digital templating, specifications, and AutoCAD software to guarantee that nothing gets lost in translation.
- We offer trained, certified, and safety focused installation crews for all projects to ensure service expectations are being met.
- Proactive manufacturing and quick production are our specialties. Project renderings are immediately put into production allowing for continuity in the schedule.
- We understand deadlines, that's why we implemented the construction management software, BuilderTrend. It allows us to better prevent project delays by increasing transparency and efficiency with project planning, online scheduling, and document management.

# HOW DO WE SAVE YOU TIME & MONEY?

LYCOS, INC.

With our dedicated team, and state-of-the-art equipment, we have crafted our process to save you time, money, and project efficiency. Specification knowledge allows for our lead times, on average, to be 12-14 days with our innovative construction methods.

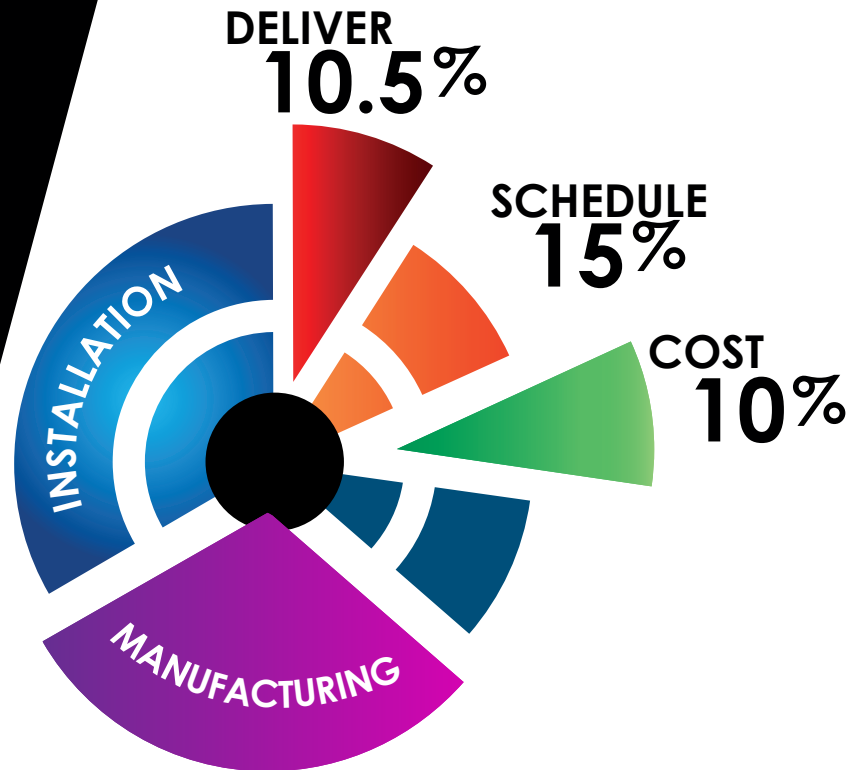

## WE OFFER FREE CONSULTATIONS

We love any and all projects, so tell us what you need help with. Based on your project needs and goals, we will present an individual plan and cost estimate that works with your budgetary needs.

## WARRANTY

Lycos, Inc. offers a one year warranty on all of its manufacturing products and installation work. This warranty covers normal wear and tear damages of products as deemed fit. Rest assured, we'll take care of you.

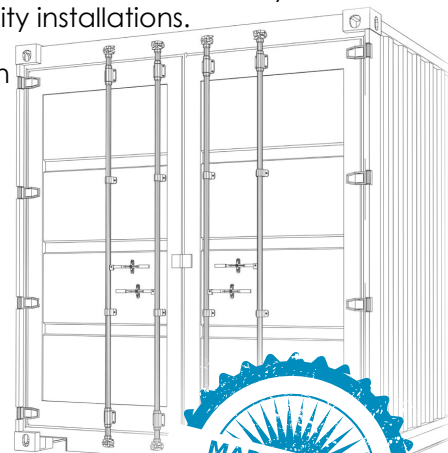

## Savings on Average:

## Ask about our Conex Storage

Rest easy knowing that projects will not be delayed due to products laying around on the jobsite. Lycos Manufacturing is proud to offer conex storage container services to assist in keeping products inventoried, secured, and out of the way of crew members. This allows for effective work flow on the jobsite, increases efficiency and productivity resulting in faster, higher quality installations.

- Prompt delivery of solid surface through conex containers
- Keep the schedule flowing by storing product on jobsite before installation date
- Decrease damage to product from proper storage
